Mathew Adeyemi

Full stack developer

Nigerian

mathewadeyemi7654@gmail.com | ☐ 08109774285

Summary

Experienced MERN stack developer proficient in HTML, CSS, and specialized in the use of modern front-end frameworks like Tailwind CSS and Material-UI. Adept at crafting dynamic and responsive user interfaces using JavaScript and React.js. Skilled in implementing pagination with React Paginate for improved user experience. On the backend, I excel in Node.js and Express.js, creating robust RESTful APIs. Familiar with real-time communication through Socket.io and proficient in database management using MongoDB. Additionally, possess expertise in integrating nodemailer for email functionality, jsonwebtoken for secure authentication, and using express-async-handler for efficient handling of asynchronous operations. .

Objective:

To obtain a challenging position in the field of computer science where I can utilize my skills and knowledge gained through education and practical experience in MERN stack development..

Technical Skills:

Frontend: html, css, tailwind css materila-ui, javascript react paginate, React.js.
Backend: Node.js, Rest APIs express.js Nodemailer, Jsonwebtoken, Express-Async-Handler Database: MongoDB
Communication: RESTful APIs, Socket.io Version Control: Git, GitHub

Projects

I built many apps and websites but i only hosted four of them. Below are the details about the apps. link to those apps and websites also available as well.

1. E-commerce-website:

This website is like amazon website where you can order for a product, make payment and many more functionality but not all functionality has implemented. Click here for the demo:
https://mathewadeyemi-e-commerce-website.onrender.com/

2. Adechat:

This app is like facebook where you can register, login to the app. on this app you can have real-time chat, post, comment, like and many more. Click here for the demo: https://adechat.onrender.com

3. **Restaurant-website:**

I built this website just to know my ability in tailwind css. The website is responsive for tablet, mobile and pc. Click here for the demo: https://mathew-restaurant-website.web.app

4. Portfolio:

This website is my personal portfolio website that contained some basic info about me, Link to my GitHub and many more. Click here for the

demo: https://portfolio-s1ov.onrender.com
